METROFFICE 1

METROFFICE 7/13

Hey, oh
 Sheets of empty canvas
 Untouched sheets of clay
 Were laid spread out before me
 As her body once did
 All five horizons
 Revolved around her soul
 As the earth to the sun
 Now the air I tasted and breathed
 Has taken a turn

Oh and all I taught her was everything
 Oh I know she gave me all that she wore
 And now my bitter hands
 Chafe beneath the clouds
 Of what was everything
 Oh the pictures have
 All been washed in black
 Tattooed everything

I take a walk outside
 I'm surrounded by
 Some kids at play
 I can feel their laughter
 So why do I sear
 Oh, and twisted thoughts that spin
 Round my head
 I'm spinning
 Oh, I'm spinning
 How quick the sun can, drop away

And now my bitter hands
 Cradle broken glass
 Of what was everything
 All the pictures have
 All been washed in black
 Tattooed everything
 All the love gone bad
 Turned my world to black
 Tattooed all I see
 All that I am
 All that I'll be, yeah
 Uh huh, uh huh, oh

I know someday you'll have a beautiful life
 I know you'll be a star
 In somebody else's sky
 But why
 Why
 Why can't it be
 Oh can't it be mine

TECHNICAL

ZONE 0 MINIMUM IP X7	NINZA <small>IP 67</small>
ZONE I MINIMUM IP X5	NINZA <small>IP 65</small> TAQI <small>IP 65</small>
ZONE II MINIMUM IP X4	APETITO <small>IP 44</small> ATSJI <small>IP 44</small> ATSJOEM <small>IP 44</small> TWERKIT <small>IP 44</small>

ZONE 0 refers to the content of the bath or shower. Here, electrical appliances are out of the question. If you still want a place in your bath or shower, it must have an IP rating of minimum IPX7 (protection against submersion) and operate on a VLSV (Very Low Safety Voltage). VLSV refers to either 12V AC or 25V DC. It is best to have the lighting in zone 0 installed by a qualified electrician

ZONE I refers to the zone up to 2.25 meters above the bottom of the bath or shower. Lighting in this zone should also work on a VLSV. The IP value in zone 1 must not be lower than IPX5 (protection against water jets).

ZONE II then goes up to 60 cm around the bath or shower. A VLSV is also required within this zone. 230V voltage is possible, in case it is a spot that is at least 1.60m from the ground. This spot must be connected to a differential of 30mA at the same time. In zone 2, a minimum IP value of IPX4 is required.

first digit : solid particle protection	↑
second digit: liquid ingress protection	→
IP X7 → immersion into water up to 1 m depth	
IP X5 → waterjet	
IP X4 → splashing water	

	CE regulations		Constant voltage driver
	Class I (ground)		Constant current led inside
	Class II		Horizontal adjustable angle
